

## Environmental policy

Hagmans Nordic AB strives to reduce its effect upon the environment by:

- Following any laws, regulations, and requirements which are set out by the relevant authorities.
- Taking into consideration the requirements of customers, employees, and the general public.
- Working with preventive measures to reduce the number of products which may result in emissions into the air and ground.
- Making more efficient use of natural resources and reducing our waste.
- Working proactively with market demands when it comes to placing eco-labelling on products.

## Quality policy

Hagmans Nordic AB's quality policy is to work according to a well-developed quality system, thereby fulfilling both internal and customer demands and specifications to ensure the highest levels of quality at the lowest cost.

- We prioritise our customers and develop our customer relationships.
- We are open to customer expectations, requirements, and views in regard to our products.
- We meet customer requirements through the continuous development of our products, production technology, and internal routines.
- Every employee has an understanding of and takes responsibility for their effect on the final levels of quality in the chain which leads to a satisfied customer.
- The different company processes combine to result in a functioning whole.
